

SIZE PVS

Size PVS is a blend of natural products and Synthetic Polymer.

PROPERTIES

Appearance	: White to off white powder.
pH of 10 % soln	: 6 - 8
Stability	: Stable from 75° C to 90° C.
Moisture	: 13%Max

SALIENT FEATURES

- a. Single shot product as well as an additive along with native or Modified starch.
- b. Provide extremely high adhesion to all fibers like cotton P/C and P/V.
- c. Size gives low viscosity which is the need of today.
- d. The product is suitable for coarse, medium and fine counts and all type of looms for the speed up to 900 RPM.
- e. It is compatible with other sizing chemicals
- f. It gives yarns a high abrasion resistance for a good weaving efficiency.

COOKING METHOD

- a. Take required quantity of initial water at room temperature only in cooker and then add required quantity of material.
- b. Continue stirring for 10 to 15 minutes at room temperature.
- c. And then raise the temperature to 120° C.
- d. Once the temperature is achieved, discontinue the steam and keep at this temperature for 5 minutes.
- e. Then size is ready for use.
